MOHAMMAD AZAB

Architect | Architectural Design, BIM and Computational Design

Amman, Jordan | +962 78 734 4321 | mohmdazab1@gmail.com

PORTFOLIO | mohamdazab.com | LinkedIn

Architect working across building design, urban interventions and computational workflows. Design work connects architecture, landscape and public life, supported by professional experience in BIM delivery, technical documentation and multidisciplinary coordination.

SELECTED DESIGN PROJECTS

The Curator | Graduation project | Wadi Abdoun, Amman | 2026

Developed a multi-level urban connector organized around Create, Play and Gather social layers; integrated architecture, landscape and circulation to reconnect fragmented parts of the city.

Spectruman | High-Rise Media City | Amman | 2025

Designed an approximately 40-dunum media-city concept with twin towers, three L-shaped podiums and a central public court, developing the relationship between tower identity, massing and public space.

Urban Pulse | Jabal Al-Zuhour Stairs | Team project | Amman | 2026

1st Place, Environmental Legacy Makers Award. Contributed to a planted public-stair intervention combining modular shade, water harvesting and community placemaking.

Ripplenest Neighbourhood | Residential design studio | New Mansoura | 2025

Developed a landscape-led master plan connecting shared public spaces, a water network and villa designs, from geometric site studies to residential architecture.

Zarqa Public Art Installation | Interactive public art | Zarqa | 2026

Contributed to three movable rail elements that let visitors compose scenes of Zarqa's urban identity; prepared 2D CNC and laser-cut geometry for fabrication.

PROFESSIONAL EXPERIENCE

BIM Lab | Amman, Jordan | Architectural Designer / BIM Team Member

Aug 2025-Present

Kingdom Hospital | Amman | Hospital Fit-Out / Architectural BIM

Built LOD 400 Revit fit-out models and produced plans, RCPs, shop drawings and schedules. Supported MEP and structural coordination; created families and applied BEP standards for worksets, naming and views.

BVLGARI Island | Abu Dhabi | Architectural BIM / Detail Design

Supported architectural and master plan coordination with linked consultant models in Revit and ACC; prepared and updated drawing and model packages for submissions.

Conceptual Tower Proposal | Benghazi | Concept Design / Rhino Modeling

Developed tower form and facade options in Rhino, including a four-storey podium and three basement levels, and refined the selected scheme through iterative massing studies.

Earlier experience: SELA, Heritage Documentation Trainee, Petra (2022): photogrammetry and Agisoft Metashape. Master Engineers, Construction Training (Jan-Apr 2023): site visits and villa construction follow-up.

EDUCATION

Bachelor of Architecture | The Hashemite University | Zarqa, Jordan

2021-2026 | GPA 3.76 / 4.00 | Graduated 2nd in Class

AWARDS AND LEADERSHIP

Awards: 1st Place, ELMA, Urban Pulse team (2026) | 2nd Place, Stories of Resilience Competition (2025) | Recognition Shield, Faculty of Engineering (2024).
Leadership: AIAS Hashemite University Chapter President (2025-2026).

TECHNICAL SKILLS AND CERTIFICATIONS

Design and computation: Rhino, Grasshopper, Dynamo, Rhino.Inside.Revit.
BIM and documentation: Revit, Navisworks, Autodesk Construction Cloud, AutoCAD.
Visualization and making: Photoshop, Illustrator, InDesign, D5 Render, Lumion, Fusion 360, Agisoft Metashape, architectural model making, CNC and laser-cut preparation.

Certifications: BIM Development with C# and Revit API | Revit Design Software, AECedx | Urban Planning and Design, UN-Habitat | Heritage Documentation Training, SELA.
